

Dear Nurses,

Greetings from JIPMER

We are pleased to announce that Hospital Infection Control Committee (HICC), JIPMER is conducting the "1st State Level Conference on **"Nurses Role in Hospital Infection Control"** targeting nurses from Pondicherry & Tamil Nadu on **5th May 2017 (World Hand Hygiene Day)** at JIPMER, Pondicherry.

Infection Control is an essential component of any health care delivery system. Implementing infection control measures from simple hand washing to high-level disinfection of surgical instruments can prevent transmission of disease in health care settings. Unfortunately, an effective and robust infection control programme is lacking in most of the hospitals in our country. Nurses play a crucial role in implementing the infection control programmes. This conference aims at educating nurses on various aspects of hospital infection control and prevention and further facilitates them to train others and implement, establish or augment the infection control programmes in their own institutes.

The number of participants selected for the conference will be limited to 300.

OBJECTIVES OF THE CONFERENCE

The nurses will be able to

1. Explain the risk of transmission of blood borne & other pathogens from both recognized and unrecognized sources.
2. Acquire knowledge about the personal protective equipment.
3. Develop knowledge in infection control and prevention measures.
4. Determine the health care facility recommendations for standard precautions
5. Gain knowledge about Needle stick injury management and prevention.
